Wanchalerm Honghom.

Software Engineer (Full-Stack)

Leipzig, Germany
wanchalerm.honghom@gmail.com

Profile

Engineer with 4+ years building consumer-facing web products, with a focus on hybrid web and native apps. Increasingly full-stack with Go. First engineer in my division to adopt AI-assisted development and to teach it internally.

Experience

Software Engineer (Full-Stack) at CHECK24 Vergleichsportal

Nov 2024 – Present

Travel · Click & Mix holiday builder · Full-time · Leipzig

- First engineer in the travel division to use Cursor. Paid for it myself at first; a few months later other engineers used it too. Gave internal tech talks on Cursor, Claude Code, Codex and agentic development workflows.
- Drove the web side of the move into the native iOS and Android apps via WebView, including login, navigation and history bridging.
- Took a large share of the frontend migration from Next.js 13 to React Router 7 (SSR, hydration, routing).
- Launched the product in Austria: carried a product-region concept through the stack, from Go and the database to routing and split tests.
- Worked on the wishlist end to end with a focus on the frontend (React, Redux); contributed to the Go/ConnectRPC API.
- Owned room selection, search and filters: View Transitions, loading states and 80+ component test files.

`React · TypeScript · Redux Toolkit · React Router 7 · Go · Protobuf · ConnectRPC · Jenkins · Sentry`

Frontend Engineer at vDrip GmbH

Aug 2023 – Jun 2024

E-commerce for digital gaming assets · Freelance · Leipzig

- First freelance project. Built an accessible component library from scratch with React Aria (WCAG), based on the design system in Figma.
- Developed in an NX monorepo and published the library as a private npm package.
- Set up Storybook interaction tests and unit tests for the library.

`Next.js · React · React Aria · TypeScript · Storybook · Vitest · NX · Tailwind CSS`

Frontend Developer at jambit GmbH

Jan 2022 – Jun 2023

Automotive · 9 months working student, then 9 months full-time · Leipzig

- Greenfield dashboard for an automotive client. At the start I was the only frontend developer and created high-level mockups in Figma.
- Built the Next.js frontend and helped shape the architecture together with the senior developers.
- Supported the Java/Spring Boot backend (Domain-Driven Design) and helped an intern get started.

`Next.js · React · TypeScript · Zustand · Tailwind CSS · Figma · Java · Spring Boot · PostgreSQL`

Frontend Developer (Intern) at singularIT GmbH

Aug 2021 – Oct 2021

Internship · 3 months · Leipzig

- Worked on internal tools such as the internal PHP/Laravel dashboard. Fixed an N+1 SQL query problem that reduced page load time.
- First production work with Vue.js; helped research state management with Vuex.

`Vue.js · Vuex · TypeScript · Laravel · PHP · PostgreSQL`

Backend Developer (Working Student) at UniNow GmbH

Oct 2018 – Sep 2019

Mobile app for students · Working student · Magdeburg

- Took over technical problems forwarded by customer support, found the cause and fixed it in the Node.js backend (Sentry).
- Connected new universities to the app, mostly through configuration; tested changes. Later onboarded new working students.

`Node.js · Express.js · JavaScript · TypeScript · Sentry`

Skills

Frontend	React · TypeScript · Next.js · React Router 7 · Redux Toolkit · Vue.js · Tailwind CSS · Storybook · React Aria
Backend	Go · Node.js · Protobuf · ConnectRPC · Java · Spring Boot · PHP · Laravel · PostgreSQL
AI & tooling	Cursor · Claude Code · Codex · Jenkins · GitHub Actions · Sentry · Figma
